

About CLC

Charles Leonard Construction Company has been an industry leader in providing metal decking since 1993. Since that time we have grown our business and have subsequently added a miscellaneous, stair and rail fabricating business: Charles Leonard Steel Services.

Charles Leonard Construction (CLC) focuses on metal decking projects in the New England, New York and New Jersey areas. Our services include estimating, project management and detailing. Our deck supplier is a Steel Deck Institute member. We have the capability to take on design build projects from start to finish, including PE Stamp, project management and site erection.

Charles Leonard Steel Services (CLSS) focuses on miscellaneous metals and steel deck accessories. Specializing in stairs, rails, miscellaneous steel, stainless steel and aluminum. CLSS has complete in house installation capabilities which ensures a superior finished product. We have completed many projects in the New England area and beyond. With a 20,000 square foot, state of the art facility, we are able to provide the highest possible quality products and customer service to the companies we serve. The creativity and imagination of our certified welders and design staff is on hand to meet all your design needs.

Charles Leonard Construction Companies all share the same goal ? to bring you quality through experience.
